SQUID GAME

무 궁 화 꽃 이 피 었 습 니 다

Whitepaper

Squid Game

The Squid Game project is a crypto play to earn platform inspired by the Korean hit series on Netflix about a deadly tournament of children's games. There is no longer dystopian world where a mysterious organisation gathers people who are in large amounts of debt and “living on the edge”. Rather than 456 players drawn from different walks of life but each deeply in debt chosen intentionally by the organizers in the drama, everyone here in crypto world can participate in the Squid Game with SQUID token or related NFTs in our marketplace. Compared to $38.5 million bonus for the last winner, we crypto Squid Game will not limit the maximum of the final bonus as well as the numbers of participates. The more people join, the larger reward pool will be. More importantly, we do not provide deadly consequences apparently! Your experience will only reflect on the joy of winning rewards and sorrow of losing money when the game failed.

Games

There are six games in Squid Game project. All the players need to start from the first game and only survivors can play the next round of game.

Red Light, Green Light

Entry Fee: 456 SQUID Level: 1

The first game on our platform is also the most iconic game in the drama. In this one, a nominated ‘tagger’ turns his/her back on the group and sings a song that matches the game’s real Korean name, which translates to “the mugunghwa flower has bloomed”. The mugunghwa is the Korean national flower. Everyone else runs until the singing stops and the person turns around. Winners can get 456 SQUID refund and be eligible to the next gameplay.

Dalgona Candy

Entry Fee: 1000 SQUID Level: 2

The players need to cut stamped shapes out of a honeycomb candy in 30 seconds, which is also called ppopgi or dalgona candy. In real life street vendors would sell the candy with a shape stamped into it and children would try and cut it out perfectly. We used the most advanced tech to make the cut experience nearly the same as the real life but it will still be slightly easier than real life candy cutting, thus we reduce the time limits to 30 seconds. Players who successfully cut stamped shapes out of the honeycomb candy will win the Dalgona Candy NFT which is the required in the next game Tug of War.

Tug of War

Entry Fee: 2000 SQUID + 1 NFT (LEVEL 1) Level: 3

This game is as simple as it sounds, the frequency of click will be transferred into power and 20 players will be formed into one group competing with the other 20 players. Winner team member will win a level 2 NFT..

Marbles

Entry Fee: 4000 SQUID + 1 NFT (LEVEL 2) Level: 4

This round is based on marbles, which is popular around the world. For those in Squid Game, teams of two are given two sets of 10 marbles and one of them must obtain all of the marbles without using violence. 20 players will form 10 teams each time to entry this round. Winners will win a set of marbles NFTs.

The Glass Stepping Stones

Entry Fee: 8000 SQUID + 1 NFT (LEVEL 3) Level: 5

In this round players have to hop across a suspended bridge lined with panels of glass – but some of it is normal and some of it tempered, or made stronger. If one of the Squid Game players chose a normal pane, then it would break and they would fall. 10 players will be get together to join this round of game. Winners will win the bridge level 4 NFT!

Squid Game

Entry Fee: 15000 SQUID + 1 NFT (LEVEL 4) Level: 6

This is a version of tag, and was played in South Korea in the 70s and 80s. It is played on a squid-like field, which is basically a square with a triangle on top, and a circle above that. Two players go up against one another, a defender and an attacker. A player from the offensive team must reach the squid's head at the top and touch it with their foot, but the defensive team will do everything to stop it. The last winner will earn all the bonus in the pool.

How does project team make money?

10% of entry fee will be sent to developers wallet and the rest 90% will be added to the reward pool for the last winner of the game.

NFTs

We will release 5 series of NFTs with different rarity and function. Each NFT you earned from the gameplay is unique and it can be used to participate in the next round of game. NFT you earned from the game can also be traded. We also provide some limited editions of NFTs in each series which enable you get better performance in the gameplay. Details as below,

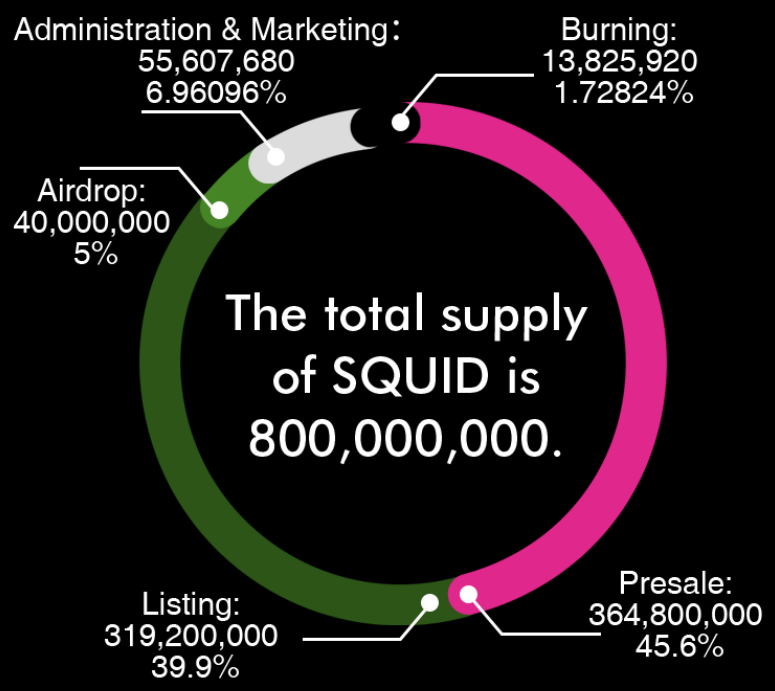
Tickets: The holder of this kind of NFT can be free to enter the game and cost one NFT.

Role: Different role NFTs have their own special abilities at the different games.

Background: Background NFTs can let the players be easier to win the small game with the same background.

SQUID Token

SQUID is the only token can be used in Squid Game. You will need SQUID to participate into a game or get restart after you fail the game. Fees are different for each games which are illustrated above in the game part.



Presale of SQUID started at 14:30, Oct 20th UTC and it's sold out in 1 second. Presale price is 800000 SQUID per BNB. The Pancakeswap listing at 14:30, Oct 21st UTC. Listing price is 700000 SQUID per BNB. SQUID will implement an innovative anti-dump mechanism. Buying in the market will release selling credits with a rate of 2:1. Purchase and chat links can be found in the front page of our official website (squidgame.cash).

Marbles Token

$Marbles is inspired by $SLP from Axie Infinity. As you can see, $SQUID implements an innovative anti-dump mechanism. Buying in the market will release selling credits with a rate of 2:1. $Marbles is the token built on BSC chain as the key for Squid Game. Obtaining Marbles without using violence is the key to Squid Game. Marbles holders will have the right to trade SQUID freely. If you regard $SQUID as $AXS, then $MARBLES must be $SLP in Axie Infinity.

About $Marbles

$Marbles is the token built on BSC chain as the key for Squid Game. Obtaining Marbles without using violence is the key to Squid Game. Marbles holders will have the right to trade SQUID freely.

Features

Hold $Marbles can sell certain amount of $SQUID token, and it will automatically burn certain amount of $Marbles. Moreover, every time the $SQUID is sold, the equivalent amount of $Marbles in the Marbles-WBNB trading pair will also be automatically burned which means the price of $Marbles will pump.

Tokenomics

The initial supply: 21,000,000 Marbles

Launch Price: $0.009 | 0.000019 BNB

The initial liquidity: 400 BNB

Daily Output: 900,000 Marbles

$Marbles Contract Address

0x9531c509a24CEEc710529645fc347341FF9F15EA

How to Sell SQUID?

1.Follow the rule

SQUID implements an innovative anti-dump mechanism. Buying in the market will release selling credits with a rate of 2:1. In addition, the maximum amount to sell $SQUID is 1/2 of total buying value in the pool so if there is no selling credit left in the pool you can not sell more even after two continues buying in small amount.

2. Use Marbles as the key

Marbles the key for Squid Game. Obtaining Marbles without using violence is the key to Squid Game. Marbles holders will have the right to trade SQUID freely. For example, if you hold some Marbles, you can sell certain amount of SQUID at any time you want on PancakeSwap. After you sell some SQUID those Marbles in your wallet will be automatically burned. At the same time, the equivalent amount of $Marbles in the Marbles-WBNB trading pair will also be automatically burned which means the price of $Marbles will pump.

Notice

- Only SQUID-BNB in pancakeswap is officially supported, which means you can only choose to swap SQUID for BNB in Pancakeswap. Users who add any other liquidity pairs will be punished.
- Turn on Disable Multihops button in Pancakeswap setting.

Marketing

Crypto Squid Game project will copy the success of Netflix's Squid Game Series not only by providing realistic gameplays but also professional marketing strategies.

1. We will make full use of world-of-mouth. Word-of-mouth is what you usually read about when you're opening a 100-year-old marketing book; it's considered an all-time classic technique. Squid Game proves that it can be the major leading factor in advertising.

2. You will see countless memes flooding your news feeds on every social-media app including Twitter, Facebook, Instagram, TikTok and, of course, all of the major cryptocurrencies forums. Moreover, our massive marketing will enable the crypto Squid Game become the trend on Twitter, TikTok, PooCoin, Dextool, CoinMarketCap and CoinGecko.

3. Most major communities in telegram will discuss about SQUID and influencers will participate in our games since we planned to cooperation with more than 200 communities and 100 influencers.

4. We will hold more than 5 airdrop activities at this stage to guarantee the interests of early attenders.

5. Marketing team is working on partnership with plenty of platforms. Players will be able to see Squid Game in all of the major games platforms. Therefore, it will attract more players to participate.

Our strong marketing strategy will improve the organic publicity and help to build a great community to a large extent.

Security

Squid Game values users trust and love and it was built ground-up with security in mind.

Audit

We are approaching an audit authority so far, audit report will be published on our social medias and website BEFORE THE PRESALE. More external auditors are welcomed to review our smart contract and please send us feedback to our official email (support@bscsquid.games).

Liquidity Lock

Liquidity of SQUID will be locked for THREE YEARS on DxSale which prevents any unseen and immediate changes to SQUID liquidity pool. Unlock date is Oct 20th, 2024.

Anti Bot

Squid Game project will adopt the anti bot mechanism. All the transaction made by bot will be added to the black list automatically which ensure the fairness for all players.
